INTRODUCING **LACASA SINK**

Lacasa sinks have been designed to fit every type of kitchen scheme, with a range of innovative, modern designs perfect for your space. You can choose between a sleek, hardwearing stainless steel model or a super-durable composite available in four contemporary thickness. You will find compact models with integrated drainers, large double sinks for when you need to spread out, and chic built-in sinks that fit flush to your worktop. With features like the Lacasa Quick Fix system, you can have your new Lacasa sink installed in minutes with no fuss or hassle.

We are also confident that you will love the special features like the choke stop free-flow drainer. Thanks to Lacasa Whisper noise defend technology you can even be sure that this will be your quietest sink ever. The sink's outercoat material is Durashield PU Waterproof Coating application that bonds completely to the steel - it helps in maintaining water temperature in sink also improves heat retention in winter. With a sink from Lacasa you'll notice the difference, making every time you use your sink less of a chore.

OUR INFRASTRUCTURE

Lacasa Sink is established in India with the aim of providing complete Kitchen Solution for all sectors and to showcase the possibility of using S.S Sink board with innovative ideas. We are equipped with state of the art automatic production lines along with the finest infrastructure to support growth and productivity helping us serve our partners and clients with nothing but the best.

MACHINERY DETAILS

Lacasa Sink invests a lot on automation, like Laser Cutting Machine, Auto Welding, Polishing, Bending and Cleaning Line, (upcoming) Stacking Robot etc., which can ensure stable superior quality steel kitchen sinks maintain.

- | | |
|-----------------------|---|

| ❑ Bending | ❑ Inspection (100%) |
| ❑ Auto Welding | ❑ Noise Defend Pads |
| ❑ Auto Polishing | ❑ Corbial Technology |
| ❑ Auto Panel Brushing | ❑ Durashiled PU Technology |
| ❑ Calibration | ❑ Logo Printing |
| ❑ Inspection (semi) | ❑ Packing (robotic machine-coming soon) |
| ❑ Ultra Cleaning | |

ADVANCED EQUIPMENTS

- ❑ Laser Cutting Machine: Biggest high accuracy contactless cutting with automation machine across Gujarat region.
- ❑ Digital Bending Machine: We are using 4 excel hydraulic CNC bending machine (Best in India till date).
- ❑ Welding & Auto Panel Welding Machine: CNC fully auto welding machine and we bring in automatic panel welding machine to keep high and stable welding quality, so as to avoid rusting and seaming marks on the AISI sinks.
- ❑ Auto Corner Welding Machine: CNC fully auto corner welding machine deliver accuracy that shows fine precision. While the manual machine does not provide accurate precision. (First time in India)
- ❑ Polishing Machine: Auto brush polishing machine in across Gujarat .
- ❑ Air Pressure Machine: Quality Control air pressure machine to check the leakage in sinks.

MATERIAL SOURING:

Using Authorised Jindal Stainless Steel Sheet For 316 & 304 Grade.

LACASA STEEL GRADE

Lacasa has been sharing its passion and dedication in the art of shaping AISI 304 and AISI 316 stainless steel, the heart and soul of our creations.

More than just Raw Material. Our know-how goes beyond selecting raw materials: Every step of the manufacturing process, from assembly to the finishes, with the aim of achieving perfection in every detail. The skilful use of AISI 304 and AISI 316 is our signature, a guarantee that every Lacasa product is an extraordinary combination of beauty and functionality.

Welcome to the world of Lacasa, where steel is turned into a story of excellence.

Stainless steel
a timeless
ecological choice

Lacasa posh brush finish stainless steel is created using special vegetable fibre brushes which give it a premium finish with minimal surface roughness. The care given during the process and the special vegetable fibre brushes make it easier to clean the steel.

AISI 304 & 316 FOOD GRADE

AISI 304

Standard Excellence:

Our extensive know-how in the use of AISI 304 stainless steel is the secret of our success.

This material, with its chromium and nickel content, is synonymous with corrosion resistance, durability and high tolerance to extreme temperatures.

Also known as 18-8 stainless steel (18% chromium and 8% nickel), AISI 304 is the starting point for creating products that are sturdy, long-lasting and non-porous.

The smooth and hygienic surface of AISI 304 steel is easy to clean and retains its brilliance over the years.

AISI 316

The Solution for Extreme Challenges:

The use of AISI 316 steel, known for its exceptional re-sistance to corrosion in harsh environments.

Originally developed for the nautical sector, AISI 316 is resistant to the effects of salt, aggressive detergents and food acids.

This unique material is used in a complete line of Lacasa products suitable for the most demanding environments and challenges.

LACASA PRODUCT BENEFITS

T-304 FOOD GRADE STAINLESS STEEL

Thicker steel means a stronger sink. Lacasa uses heavy-duty T304 Gauge Stainless Steel resulting in a sink that is noticeably sturdy with a quality look and feel. Sinks constructed using T304 Gauge Stainless Steel offer long-lasting durability, with excellent resistance to corrosion, dents, and damage.

MODERN TAPERED SIDE WALLS

All Lacasa sink are specially designed with narrow slope and tapered side walls to ensure that no dirt or residue ever remains stuck for easy cleaning.

2mm Frame

2mm frame is used in all lacasa handmade sinks. The embodiment of thicker frame give more strength and solid look. We assure a durable sink and a great look.

CORNER R10 RADIUS

All Lacasa sinks are innovated with 10mm radius curved corners designed for easy cleaning, making this bowl sink smooth to clean while reflecting the latest trends in the modern kitchen fashion.

X-DRAIN ASSURE – WATERWAY

An integrated waterway channel that offers enhanced functionality, the X-Drain Assure waterway system is engineered to direct water into the drain even when the sink is full of dishes, helping prevent standing water in the bottom of the bowl.

**PROTECT DRAIN**

The next generation Protect Drain is the perfect solution to have a clog free drain, The dual anti-clog technology is used to remove waste in smarter way. The first bin helps to stop the large particles from moving down in the drain and clogging it, the second works for finer waste. Easy to clean this drain is a hygienic way of food disposal, and can be emptied out in a bin without any hassle.

**NOISE-DEFEND SOUNDPROOFING TECHNOLOGY**

Noise-Defend sound dampening technology features super-silencer pads on all sides of the sink that help prevent noise and vibration from dishes and garbage disposal when the sink is in use.

**PROTECTIVE FILM**

A protective film coating is mandatory applied to the surface of stainless steel sinks to safeguard them from scratches and damage during shipping and installation. This film is usually a durable, plastic-based material that easily peels off without leaving residue. It should be remove after installation, before use.

**NON-MAGNETIC STEEL**

Magnet test is a credible test to distinguish Lacasa Kitchen Sinks from their competitor in the market. All Lacasa sinks are guaranteed non-magnetic.

**EZY-STACK NESTED PACKAGING**

Sinks designed with nested dimensions allow for easy storage and transportation. To accommodate large projects for builders these sinks stack perfectly, increasing efficiency for everything from shipping to delivery to job-site containment.

LACASA OUTER COAT & BOWL THICKNESS

DURASHIELD PU COAT TECHNOLOGY

Durashield PU waterproof coating from house of Lacasa is finish application results in a white color coating that bonds completely to the steel, greatly improving durability and clean ability, odourless with superior resistance to abrasion, chips, and corrosion. It helps in maintaining water temperature in sink, also improves heat retention in winter.

BOWL THICKNESSES

At Lacasa, every sink is crafted to deliver lasting performance. Available in thickness options of 1.00mm (20 Gauge), 1.20mm (18 Gauge), 1.50mm (16 Gauge), and 2.00mm (14 Gauge) across our collections, each sink is designed to suit varied needs and preferences. Made with premium AISI 304 grade stainless steel, Lacasa sinks offer the perfect blend of durability, strength, and style for a smart family kitchen.

AISI - 316 MARINE GRADE

Casamarine Collection is made with high grade 1.00mm thickness AISI - 316 (18/10) stainless steel (18% Chromium, 10% Nickel). As it contains "Molybdenum", which gives it much better protection against salt, chemicals, and moisture. That's why AISI - 316 is used in marine equipment and medical tools-it lasts longer, even in harsh conditions.

CROBIAL COAT TECHNOLOGY

Crobial Coat is a durable, clear protective black coating providing protection for surfaces from rust, tarnish, corrosion and oxidation. Crobial Coat has built in Antimicrobial technology for an added level of protection against the growth of microbes

BOWL THICKNESS

Lacasa uses 0.80mm thick steel for project segments in Casabella & Casaboard(CBE) Collections with AISI - 304 (18/8) Stainless Steel (18% Chromium, 8% Nickel). This makes the sinks less vulnerable to denting and bending even after years of receiving knocks from utensils.

OUR PEOPLE & PASSION

Our team is young and dynamic, with a strong-driven multicultural mission. Our people use their passion, enthusiasm and highly specialised skills to turn the important targets to achieve a win-win situation. Our Ambition is to create high quality, exclusive products that enrich people's lives by combining the best of Italian creativity and technology with integrity and tradition of Indian manufacturers. Only by creating a successful and well-integrated team of most talented members in history with tradition, and values to deliver excellence.

AWARDS AND ACCOLADES

ISO 9001:2008 Certificate for
Implementing a Quality Management
System

AISI - 304
1.00mm Bowl Thickness
Anti-Scratch

ANTI-SCRATCH

The special honeycomb surface on these sinks gives it Anti-Scratch properties. Anti-scratch sinks retain their contemporary elegant & immaculate look for years.

*Available in handmade sink.

POSH BRUSH

Posh Brush finish is similar to satin finish which undergoes additional polishing that gives the appearance of micro lines running across the length of the product, giving it a rich elegant look and feel.

*Available in handmade sink.

SATIN

Satin finished sinks have that rich, buffed silver look achieved by a hi-tech process. LACASA SINK is the only brand that has specially imported these polishing machines from Germany & Italy, to attain this finish.

*Available in hydraulic press sink.

GLOSSY

Glossy finished sinks have mirror like shining look.

*Available in hydraulic press sink.

LACASA STEEL SUPPLIER

Lacasa jindal steel license mou number, renewed every year.

JINDAL STAINLESS STEEL

Lacasa Stainless Steel sinks are manufacture with premium materials sourced directly from Jindal Steel, backed by a Memorandum of Understanding (MOU) that guarantees authenticity and quality. Our sinks feature high-grade stainless steel, including AISI 316 and 304 steel grade. By partnering with Jindal Steel and using high-quality materials, we ensure that our sinks meet the highest standards of quality, durability, and performance.

LACASA WARRANTY

25 Years Warranty

All Lacasa handmade stainless steel 304 grade sinks are guaranteed for 25 years against fully workmanship & material.

10 Years Warranty

All Lacasa brass faucets are guaranteed for 10 years against fully workmanship & material.

1 Year Warranty

All Lacasa drainage coupling, steel colander tray, accessories are guaranteed for 1 year against fully workmanship and material.

CASAMARINE COLLECTION

MARINE GRADE AISI-316

Including Accessories

RDR01
SINK DRAINER

Made for tough kitchens, Our Casamarine collection sinks use High Grade AISI - 316 (18/10) Stainless Steel (18% Chromium, 10% Nickel) the highest quality steel used in kitchen sinks.

Most sinks in the market are made from 304 grade steel, which is strong and rust-resistant. But 316 grade goes a step further. It contains molybdenum, which gives it much better protection against salt, chemicals, and moisture. That's why 316 is used in marine equipment and medical tools-it lasts longer, even in harsh conditions.

316 vs 304 - What's the difference?

Better rust resistance - 316 holds up in coastal areas, wet kitchens, and with strong cleaners.

Stronger over time - No surface wear or dullness with regular use.

Easier to clean - Less chance of stains or marks sticking to the surface.

More hygienic - Fewer spots for bacteria to grow.

Role of Steel Thickness in a Kitchen Sink’s Life – 2 mm Steel

Experience next level craftsmanship with Fendi kitchen sinks feature premium 14-gauge stainless steel, a 2 mm bowl sink offers exceptional structural strength, allowing it to withstand daily impacts from cookware, temperature changes, and heavy use without flexing or deforming. This protects a stable foundation for superior craftsmanship. Clean edges, consistent depth, and ensuring the sink continues to look and perform as intended for years.

Thickness:

2mm bowl thickness is the highest bowl in india.

Durable:

Constructed of superior quality 14-gauge stainless steel.

Quiet & Comfortable:

Heavier steel naturally absorbs sound and vibration for a serene kitchen experience.

Durashield Pu Coat Technology:

Durashield PU waterproof coating from house of Lacasa is finish application results in a white color coating that bonds completely to the steel, greatly improving durability and clean ability, odourless with superior resistance to abrasion, chips, and corrosion. It helps in maintaining water temperature in sink, also improves heat retention in winter.

CROBIAL COAT TECHNOLOGY

Crobial Coat is a durable, clear protective black coating providing protection for surfaces from rust, tarnish, corrosion and oxidation. Crobial Coat has built in Antimicrobial technology for an added level of protection against the growth of microbes

- 0.80mm thickness
- Posh brush finish
- Crobial powder coating
- Insect proof concentric coupling
- Essential Use

LACASA GLASS RINSER

The Smarter Way to Rinse

The Lacasa Glass Rinser uses powerful water Jets to blast away residue In second, With a 5 inch opening that accommodates larger containers like wine glasses, baby bottles, and even travel mugs, ensuring a thorough rinse. The design features 9 jets that are optimally angled to clean containers of any style, with 6 soft silicone strips that support delicate glassware. An Integrated lock system helps prevent accidental activation. The spacious sloped opening ensures quick water drainage directly into the sink, keeping counter tops dry.

POWERFUL PERFORMANCE

Designed to blast away residue in seconds with powerful water jets

LARGE OPENING

Wide 5 inch opening accommodates containers of all sizes, from wine glasses to tumblers

INTUITIVE OPERATION

An Integrated lock system helps prevent accidental activation

INTRODUCING

LACASA

BESPOKE

ENGINEERED

SINK

The Exquisite Art of Bespoke Engineering

A Journey into Quality, Luxury, and the Gentle Touch of Style

Lacasa is dedicated to the art of bespoke engineered kitchen solutions for those who value classic, timeless design. We create enduring pieces that transcend trends, offering a refined collection of handcrafted steel sinks designed to elevate the heart of your home.

Our team of skilled designers and engineer craftsmen work closely together to create handmade sinks that seamlessly complement your kitchen’s architecture and personal style. Every Lacasa sink is thoughtfully engineered, meticulously crafted, and built to last a lifetime.

Each bespoke handmade steel sink is created entirely from scratch to reflect the individual preferences of our clients. From the choice of steel grade to design details such as step-in styles, taps, double bowls, and drain boards, every element is tailored to your vision.

If you’re about to embark on your first bespoke engineered sink experience, here’s a step-by-step guide to help you understand the journey and what to expect along the way.

1. Initial Meeting:

The bespoke design journey begins with a personal consultation between our design team and the client. We explore style preferences, functional requirements, material selection, bowl thickness, outer coat and design possibilities, ensuring every detail aligns with the envisioned space.

This phase establishes a clear design vision while fostering a collaborative relationship between client and engineer, laying the foundation for a truly tailored masterpiece.

2. Measurements & Style Drafting:

Following the consultation, our team takes precise measurements to ensure a perfect fit. The engineer considers all relevant dimensions, including specific cut sizes in granite or marble, to ensure optimal style and comfort. Attention to detail is essential, as even minor discrepancies can affect the final result.

Using these measurements, our engineers creates a unique pattern that serves as the blueprint for forging the stainless steel sink. Every style is tailored to the client's specification.

Details: Sink Length, Width, Tap hole sizes in mm.

3. Material Selection:

Once measurements are finalized, bespoke sinks are crafted from finest quality Jindal materials, such as 316 or 304 steel, ensuring durability and longevity. Clients can choose from below options.

316 Stainless Steel: Enhanced with molybdenum for superior corrosion resistance, especially in saline or high-humidity environments, combining strength with premium longevity.

304 Stainless Steel: Offers excellent corrosion resistance and durability, ideal for residential and commercial use, with a smooth, long lasting hygienic finish.

Choose Your Bowl Thickness:

2.00mm Thickness (14 Gauge)
Maximum strength - Exceptional rigidity and premium heavy-duty performance.

1.50 mm Thickness (16 Gauge)
Heavy-Duty Strength - Excellent durability with superior structural stability.

1.20 mm Thickness (18 Gauge)
Premium Performance - Ideal balance of strength, durability and refined design.

1.00 mm Thickness (20 Gauge)
Everyday Performance - Strong, durable and engineered for reliable everyday use.

0.80 mm Thickness (22 Gauge)
Project Based - Design for project application

Choose Your Finish:

Posh Brush Finish - Refined brushed texture with an elegant premium appearance.

Anti - Scratch Finish - Advanced textured finish engineered for enhanced scratch resistance and everyday durability.

Choose Your Outer Coating:

Durashield PU Coat

A white waterproof coating that bonds to steel, enhancing durability, abrasion resistance, and cleanability. Odourless, protects against chips and corrosion, and helps retain water temperature in the sink during winter or cold weather temperature.

Crobial Coat

A clear black protective coating that guards against tarnish, and oxidation. Built-in antimicrobial technology adds protection against microbial growth, ensuring hygienic performance.

Classic Bowl Configuration:

Single Bowl

Single Bowl with Tap Hole

Classic, space-efficient design for residential or light commercial use, with optional tap integration.

Double Bowl

Double Bowl with Tap Hole

Versatile layout for simultaneous tasks, providing functionality and efficiency, with optional tap accommodation.

Single Bowl with Drainboard

Single Bowl Drainboard with Tap Hole

Combines a practical workspace for washing and draining, with optional tap integration.

Double Bowl with Drainboard

Double Bowl Drainboard with Tap Hole

Enhanced multitasking design, ideal for high-traffic kitchens, with optional tap placement for convenience.

Step Bowl Configuration:

Step Sink Single Bowl

Step Sink Single Bowl
with Tap Hole

The Step Sink features a multi-level bowl design, creating distinct zones for washing, rinsing, and draining. Engineered for enhanced workflow efficiency, it allows simultaneous tasks while maintaining water containment and cleanliness. Its sleek, ergonomic steps integrate seamlessly into modern kitchen layouts, combining functionality with architectural elegance.

* Requires a minimum 1.00 mm stainless steel construction to ensure structural integrity, durability, and optimal performance.

Choose Your Bowl Depth:

Custom Bowl Depth From 9 inch to maximum 12 inch.
Select the Depth that best suits your kitchen and usage requirements.

Bespoke sink sizes can be customised up to a maximum length of 55 inch, subject to design and manufacturing feasibility.

4. Finishing Touch:

Once all specifications are finalized, the bespoke stainless steel sink enters the final construction stage. Our skilled engineers meticulously forge each sink, ensuring structural strength, durability, and a flawless finish. Techniques such as X-diversion, auto laser welding, auto corner radius and decorative elements are carefully crafted to enhance both aesthetics and functionality.

Personalized touches, including laser monograms or bespoke client requests, add exclusivity, making each sink truly one-of-a-kind.

5. Investment:

While a bespoke sink represents a higher initial investment than a standard option, it delivers enduring value through superior craftsmanship, longevity, and timeless design. Designed to withstand daily use and evolving trends, a custom sink eliminates the cycle of frequent replacements—offering a considered, long-term solution that rewards both style and comfort.

6. The Timeless Masterpiece:

After several weeks of meticulous craftsmanship, the bespoke handmade steel sink is complete. We conduct a final handover to ensure every aspect meets the client's expectations. This moment represents the culmination of the client's vision and the engineer's skill.

A bespoke sink offers comfort and style that off-the-rack or standard sinks cannot match, making it a worthwhile investment for those who value quality and craftsmanship.

LACASA FAUCET

Redefine Your Kitchen with Lacasa Faucet

Experience the perfect balance of style and substance. Lacasa faucets are expertly crafted for modern living, featuring a solid body for unmatched durability.

Designed for seamless integration into any kitchen, our faucets feature an extended-reach spout for effortless rinsing and a premium Chrome finish that resists fading and corrosion. With precision engineering for smooth flow control and long-lasting cartridges, Lacasa promises exceptional performance—day after day, year after year.

Variations: Available in Cold Taps & Mixer Taps

**CASCADE FLOW**

This supreme technology creates a stress relieving work experience.

**SOFT TURN**

Soft Turn cartridge technology gives the user precise control over water flow & temperature. The development of this technology has been possible as we are one of the few importer from hassem, kerox cartridge & implemented in our faucets.

**JOYSTICK TURN**

An innovative concept in water control, Joystick technology presents a style which is distinct from the more traditional single lever, but which gives the same performance as Lacasa soft turn technology.

**PROGRESSIVE TURN**

Taps with progressive technology always start the flow with cold water & as you continually turn the control the flow changes to a mix of hot & cold meaning water systems are only activated when hot water is required thereby saving energy.

**ECO DISC CARTRIDGE**

This Lacasa exclusive technology helps to save water & energy. As the tap handle is moved, a slight resistance is reached at 50% of the water flow; lifting beyond this bite point produces a full flow. The cartridge has a temperature limiter which can be set at installation to eliminate the risk of scalding. The temperature limiter can be altered after installation.

**EVER SHINE**

Lacasa's innovative Ever Shine chrome plating system, involving electrolytic coating, produces a hard-wearing finish on all faucet taps. It helps to maintain the shine & makes for easy cleaning.

**SAFE TOUCH**

Development in materials has allowed Lacasa to develop Safe Touch technology which prevents the chrome plating on thermostatic fittings from overheating. This eliminates the risk of scalding & is particularly beneficial in environments used by the young, & the elderly.

**QUICK REACTION**

Quick Reaction technology ensures that Lacasa thermostatic fittings reach the required flow & temperature in less than 3 seconds. Both then remain constant, irrespective of variations in water pressure.

GUIDELINES TO MAINTAIN LACASA STAINLESS STEEL SINK PRODUCTS

- Carefully inspect the new product for any damage before installation.
- Lacasa is not liable or shall not be responsible for any such damage or for improper installation. The installation should be done by trained technician.
- Clean the sink at least once a week. When cleaning use mild soapy water and rub in the direction of the grain lines, rinse and towel dry.
- Drying is important to eliminate collection of lime scale, mineral deposits and calcium stack.
- Always rinse the sink after every use and wipe dry.
- Avoid use of cleaners & bleachers containing harmful chemicals and acid.
- Avoid prolonged contact with citric or high salt concentration food as it can lead to staining, pitting and corrosion of the sink.
- Steel wool / wired brushes / abrasive sponge pads are not recommended for cleaning as it leads to scratches and rusting on the sink.
- Do not use the sink drain board as a cutting or chopping board as it will leave scratches on the sink.
- Do not remove the film coating on the sink before installation to avoid scratches and damage during installation. Remove the film only after installation, but before use.
- Remove all traces of cement, mortar, lime, POP etc. used during installation as it can lead to surface rusting or pitting.

GUIDELINES TO MAINTAIN LACASA FAUCET PRODUCTS

- Carefully inspect the new product for any damage before installation.
- Lacasa is not liable or shall not be responsible for any such damage or for improper installation. The installation should be done by trained technician.
- Water Scaling: Due to presence of minerals and salt in water, scaling is formed on the product if it is not cleaned regularly. The products should be cleaned gently at regular intervals. Also, take extra care to clean the edges and corners of the products because these areas are more vulnerable for scale settling.
- Clean the aerators from time to time for a perfect foam flow of water from the faucet. The property of water being used is very important for your plumbing installations (Pipes etc.)
- Acid Fumes: When we clean the tiles or floors in the bathroom with cleaning agents which contain acids or chemicals, acid fumes are formed. Because the basic material used in the products is brass, brass being an alloy of copper reacts with these acid fumes. with the reaction, a green coloured layer is formed on the products resulting in damage to the outer finish or coating.
- Scratching While Cleaning: Scratching or scrubbing occurs due to hard nature of cloth or coarse cleaning powder being used for cleaning. Use a gentle fluffy soft cloth for cleaning the surface.
- Atmospheric Conditions: This condition applies mostly to salt content in the air in coastal areas, sometimes the air reacts with brass and black spots emerge on the surface of product. Therefore the product is required to be cleaned regularly.
- At the time of installation of the products, cover the products with the cloth covers provided in packaging or with polythene till the time you actually start using them.

WARRANTY POLICY

Pricing: MRP and product specifications are subject to change without notice. Pricing for india purchase only.

Taxes: prices are inclusive of goods service taxes (GST).

Loss and/or damage in transit: our liability ceases upon delivery of the goods to the carrier at our warehouse. Claims for damage and/or loss in transit to be made by the consignee against the carrier.
